Information that EVERYONE should read! After being diagnosed with high mercury levels from my doctor, I have been researching the devastating effects of mercury poisoning. I am so thankful for Dr. James E. Hardy for speaking out against one of America's most blatantly deceptive organizations in our country, the American Dental Association. He is very thorough in explaining the incredible and numerous effects of "mercury" fillings on the individual, our society and the environment. Even if you don't have "silver" fillings, this does effect you on a daily basis, you just don't know it. Read this book and others to find out how. Give it to those you love with "silver" fillings, and find a "Mercury Free" dentist to remove them properly!

This book will probably never be a best seller b/c it goes against what the American Dental Association has recommended. It's a personal truth for me. Currently I am going through mercury removal and I know how important it is to get it out of my mouth, and out of my body because mercury is a toxin. I had met Dr. Hardy many years ago and listened to his lecture but was unable to

undergo the dental work to remove the mercury because of financial constraints. I saved over the years and now this is really a happy time for me. I just can't understand the greed for money by the dentists who still use mercury and know that all other mercury is banned and yet somehow placing it in someone's mouth is safe. This is a pretty sick practice if they knowingly put someone's health at risk.

I am a physician that has a wellness medical practice in Orlando, FL. I read this book on the plane ride and could not put this book down. I love it! As soon as I got back from vacation I made an appointment to see Dr. Hardy. He is an amazing dentist and is very thoughtful and kind with excellent bedside manners. His staff is also very friendly. I am now proud to say that I am mercury free. I strongly recommend this book to my patients that are not feeling well and have amalgams. Edwin Lee, M.D., F.A.C.E. A must read if you care about your health!
